

Functional Specifications

FOR VISITORS (Unauthenticated Users), the application allows:

Course Browsing

- Display by default the list of all available courses
- Display all courses containing a specific keyword
- Display all courses filtered by type (In-person or Remote)
- A course is characterized by: name, description, duration (in days), type (In-person/Remote), price

Account Management

- Create a user account (login + password)
- Login to access cart and order features

FOR AUTHENTICATED USERS, the application additionally allows:

Cart Management

- Add courses to the cart
- Remove courses from the cart
- View cart content with total amount
- Cart persists across sessions (saved in database)

Order Management

- Place an order (requires non-empty cart)
- Provide client information when placing order: last name, first name, email, address, phone number
- View order history (list of past orders)
- View order details (order lines with courses and prices)
- One user can place multiple orders for different clients

Session Management

- Logout (cart is preserved)
